Forest Corridor

One major attraction is the creation of an approximately 100m wide and 5km long **Forest Corridor**, a collaboration between HDB and National Parks Board (NParks), which forms part of the larger network of greenery that connects the Western Water Catchment Area and the Central Catchment Nature Reserve.

This Forest Corridor will be planted with various tree species to transform it into a rich forest habitat.

Forest Fringe

Complementing the Forest Corridor is the Forest Fringe, a 15m to 20m wide linear greenscape that provides a peaceful and rustic environment for residents to enjoy flora and fauna, and envelops the town within a scenic and natural landscape.

Extensive park spaces such as the Central Park and Community Farmways string key amenities and facilities together, providing a safe environment for residents to access their daily amenities.

Co-Living with Wildlife

These green spaces in Tengah are the natural habitats of wildlife (such as birds, bats, snakes, long-tailed macaques) and we share these spaces with them.

To co-exist safely and responsibly with wildlife, we will need to be mindful of our actions and habits that may be seen as threatening, or attractive to them.

CHECK OUT!
