7 adult fitness stations / elderly fitness stations

23 community living room across 15 residential blocks

Special design / Features

The design of the building is inspired by the gentle feeling of a light rain. It uses rhythmic patterns on the walls that make the exterior look charming and attractive, like a beautiful melody.

By using only one color for the building's exterior, it recalls the classic look of nearby black-and-white colonial houses, giving the area a distinctive and memorable character.

Special design / Features

At ground level, the landscape has a soft, wavy shape that mimics the gentle ripples left by raindrops. The area is covered with lush, green plants, creating a calming and lively environment that blends smoothly with nature and encourages a peaceful, active way of life.
